

A Message from Those Who Create Jobs...

Dear Mr. President, Senators and Members of Congress:

Credit continues to be a problem for businesses of all sizes - businesses which create jobs. We would like to suggest a step that could inject up to \$13 billion into the economy – **at no cost to taxpayers.**

- Credit unions continue to lend even when banks have cut back;
- Credit unions play a vital role in providing capital to underserved communities and small businesses; and,
- Credit unions understand the special needs of their business members and can make loans that banks will not.

We urge you to allow credit unions to expand lending to their business members.
